Ablation Confirmation offering the only integrated image processing software to evaluate the technical success of procedures

Ablation Confirmation (AC) is a CT image processing software that resides on a second, dedicated monitor attached to the NEUWAVE™ Microwave Ablation System.

Benefits of Ablation Confirmation

**Lock your target**
Define and lock your target volume for improved probe placement accuracy and margin analysis.

**Evaluate probe placement**
See the exact proximity of the probe to your target by viewing combined target and probe placement scans.

**Confirm technical success**
Verify technical success of the procedure by viewing combined target and ablation zone scans.

**Demonstrate your success**
Clear 2D and 3D procedure images are stored to PACS and can be shared among patients, referrers and peers to showcase your procedure success.
