Mega Soft® Universal

PATIENT RETURN ELECTRODE
The only grounding pad designed for all patient sizes above 0.35 kg with no maximum weight.

CLINICAL RELEVANCE
The Mega Soft Universal is very easy to use. It is placed on the operating room table and covered with a sheet and draw sheet.

- Complex positioning can be managed by use of the chart located on the pad’s surface.
- Compatible with most competitive isolated electrosurgical generators. See IFU.
- Universal Dual Cord can be used with two generators simultaneously.
- Superior safety record having been used in over 75 million procedures with zero pad site burns.²

Medical liability costs are documented as 2.4% of total healthcare spending or over $55 billion dollars¹.

¹ Total US Healthcare Spending
² Medical Liability Costs: 2.4%
MEGA SOFT® UNIVERSAL PATIENT RETURN ELECTRODE

PATIENT OUTCOME BENEFITS

• No adhesive from sticky return electrodes means no hair removal, no skin tears, and no adhesive reactions.

It is estimated that 15% of patients aged 65 and older will have an adhesive related injury while hospitalized.3

VALUE

• Cost comparison between standard sticky pads and Mega Soft Universal typically results in a savings.
• One purchase order issued every two years, instead of weekly, reducing backorder concerns.
• No storage or warehousing requirements.

Sticky pad waste disposal cost:

3000 Pounds = $3000

Mega Soft:

50 Pounds = $50

Surgical waste estimates are upward of $1.00 per lb. a 10-room hospital performing 30 cases per day will dispose of 3,000 lbs of sticky pad trash compared to 50 lbs. of Universal trash in the same time period.
