Shaping the future of surgery in the fight against obesity and metabolic diseases

Our comprehensive approach helps surgeons achieve their best outcomes and enables more patients to receive the care they need.

**Research and Evidence**
- Driving the body of evidence that shows surgery is the most effective and durable treatment for severe obesity and benefits extend beyond weight loss with improvement or resolution of related health conditions
- Demonstrating the impact of bariatric surgery on obesity and related diseases

**Education and Training**
- Providing the most comprehensive suite of bariatric professional education programs: Educating on current and emerging procedures, best practices to enhance the patient experience and coordinated patient care models
- Advancing today’s most effective surgical treatments for severe obesity and metabolic health

**Access and Reimbursement**
- Leading the way to expand and protect patient access to bariatric surgery: Offering tools and resources to demonstrate the clinical economic value to patients, payers, clinical and nonclinical stakeholders
- Reducing the coverage barriers to surgery so more patients have access to bariatric surgery

**Innovative Products**
- Innovation based on the evolving needs of surgeons and providers: Providing the most comprehensive portfolio of market leading products and resources to perform bariatric surgery
- Dedicated to delivering the best clinical and economic outcomes, validated with evidence

**Our Commitment to Bariatric and Metabolic Surgery**
Innovation in Bariatric & Metabolic Surgery
